MARC BRIEFER  
Interior & Industrial Designer

#### About us

We are a creative office based in Zurich with focus on interior architecture and design. As a team we exchange ideas, develop implementation strategies and discuss solutions. We create projects as a whole, which radiate atmosphere. Relevant therefore are the needs and wishes of our international clients. We consider ourselves as a provider for individually designed concepts.

As interior architects and designers we plan renovations, create interior spaces, stage brands and make furniture drafts. From residential to commercial projects we give advice to contractors, building owners and architects. In every state of the planning process we are there for our clients and the know-how we have gained over the years make us a reliable partner.
