brahler SYSTEMS

Braehler referances in Kuwait

* Kuwait National Assembly:

CDSVAN & AUTOMIC. The challenge and customer's specifications were to supply a microphone installation unit in which the microphone system works as a CDSVAN system in standard operation and, in the case of a potential malfunction, a backup is created in which the entire system can be switched to an AUTOMIC. This concept was implemented on schedule in October and has been used every day since the Kuwaiti prince's official grand opening celebration on 29 October 2014.

brahler SYSTEMS

Braehler referances in Egypt

*** People's Assembly:**

In successful cooperation we were able to furnish the Parliament of Egypt with a conference technology upgrade. The Brähler system already in place was replaced by a new customer-specific digital system with discussion and voting functions for 650 delegates, whereby the chip cards used for voting and attendance checks are designed as a new type of hybrid technology. The new delegate units are a custom product with a specially manufactured customer specific front plate and hinged cover. Another further for Brähler ICS was the recessed TM57 microphone built into the table developed by Brähler. Every two delegate units are connected to a microphone and can be individually extended by the delegates at any time as needed.
